# You Want Paradise?

## You've got it! With VXI's Parrott Bermuda and Montego Advanced PC Headsets.

With VXI's Parrott Montego (binaural) and Bermuda (monaural) headsets, you'll enjoy optimum headset performance with ALL the multimedia programs that you use! High-performance components ensure superior performance with today's demanding applications making them the headset of choice for speech recognition and Internet telephony. The Parrott Bermuda and Montego headsets are packed with user-friendly features that will greatly enhance your headset experience. Enjoy the convenience of the in-line pendant featuring microphone mute button, fine tune volume control and quick disconnect. The VXI Translator™ features a speaker jack that will enable you to keep your headset speaker plug and your computer speakers connected to the computer at the same time.

Parrott headsets include a high-quality noise cancelling microphone and VXI's unique Translator™ to optimize sound quality and guarantee compatibility with the sound card. High-standard construction plus years of design experience unite to offer a headset that you can maintain confidence in day after day. Includes VXI's two-year unconditional warranty.

## The Parrott Bermuda and Montego Advanced PC Headsets

The VXI Parrott Bermuda and Montego PC headsets will more than meet all your PC audio needs whether you're using speech recognition software, making phone calls over the Internet, playing voice-enabled multiplayer games or listening to multimedia files or CD's. Our noise cancelling microphones block out unwanted background noise to ensure the highest degree of accuracy available for speech recognition. Plus, VXI's award-winning Translator™ technology eliminates distortion and optimizes the sound of your voice. The VXI Translator also guarantees universal compatibility with all PC, laptop and palmtop sound cards. An added benefit of the Translator is the integrated speaker jack that allows you to maintain your computer speaker connection in conjunction with the output through your Parrott Bermuda or Montego headset. Now, both can be used at the same time!

All-day-wear comfort is a reality with an adjustable headband designed to contour with the shape of your head without squeezing, or snagging your hair. The soft, slightly cupped ear cushions help enhance sound and maintain the headset's position on the ear. The virtually indestructible "gooseneck" microphone boom is adjustable to nearly any position and **always** holds its position - very important for optimal speech recognition accuracy. The in-line pendant features a quick disconnect for convenient release from the lower cord for those times when you need to walk away but would like to continue wearing your headset. Also included on the pendant is a fine-tune volume adjust for greater listening control, a microphone mute button and a clothing clip for easy cord management. The Bermuda's single-ear design enables you to keep one ear open and the Montego offers a more encompassing listening experience with its two-ear/stereo design. All this, plus VXI's **unconditional** two-year warranty!
