The Parrott™ Aruba Headset System

Clarity, comfort and style come together in the monaural Aruba headset system. When stereo sound isn't needed, this is the computer headset that sets the standard for accuracy and USB simplicity. The Aruba's in-line pendant features a Quick Disconnect, fine-tune volume control, clothing clip and microphone mute. Of course, the Aruba utilizes a noise canceling microphone to block out background noises that could interfere with conversation or dictation. Aruba's unique graphite color, adjustable headband and soft temple pad make this monaural headset system look as great as it performs.

The Parrott™ Caribbean Headset System

Take the Aruba and add some real heat with full range stereo sound and you've got the Caribbean. The Caribbean's convenient and user-friendly features include VXI's unique pendant with Quick Disconnect, fine-tune volume control, clothing clip, and microphone mute. The Caribbean headset system also utilizes a noise canceling microphone to block background noises - ensuring higher quality voice input. Add graphite styling and an adjustable headband, and you're really jammin' with the Caribbean!
