CORTELCO

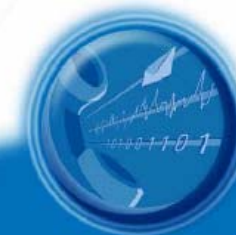

Corsair

Listen to your customers

Customers want good service. By offering them *clear* directions who to contact and *always* letting them leave a message, Corsair Voice Mail / Automated Attendant systems help you *improve* your service and promote your business.

- **Automated Attendant** with multilingual feature, directs callers with a range of pre-recorded instructions, in your choice of up to three languages. Record multi-level, personalized scripts and informational messages so callers are prepared *before* they speak to your representative.
- **Voice Mail** with up to 500 mailboxes, each with a customized greeting, so your customers can *always* leave a message with the right person.
- **Unified Messaging** for the more sophisticated office sends your messages to your PC via E-mail. Allows you to set up additional alerts to external phone numbers.

Corsair Voice Mail Systems with Automated Attendant

Never miss a customer call with the Cortelco Corsair Voice Mail and Automated Attendant solutions. Effectively direct your incoming call traffic to the best possible people in your organization, even if they are off-site. Let callers choose to hear system messages in their choice of language (English, French or Spanish) and follow up on missed calls both inside and outside the office.

The Corsair Voice Mail system is designed with the latest technology to include Flash Memory and Digital Signal Processing (DSP). The system software has been tightly integrated with the Millennium Digital Business Communications System to allow for SMDI signaling. This integration greatly improves the easy accessibility and utilization of the advanced call routing capabilities available with the Millennium PBX.

- **Cortelco's Corsair**, the latest version of our superior Unified Messaging and Voice Mail Solution, designed for medium to large sized businesses with between 20-300 employees: 500 Mailboxes, 4 or 8 ports.

Upgrade your Cortelco Corsair with our range of Add-On Features

Improve the performance of your **Cortelco Corsair** with these optional capabilities.

Corsair Expansion Modules

- **4-port / 36 Hour Memory**

Expand your port and recording capacity with an additional 4-port expansion module. Simply insert the 4-port card in the expansion slot and your Corsair increases from a generous 4-port/36 hours of memory to an impressive 8-port configuration, providing a total of 72 hours of recording memory.

4 Port Expansion Module

- **Unified Messaging**

Add sophisticated Unified Messaging functionality to your Corsair with a Unified Messaging expansion module. Configure your system to send E-mail notifications with or without recorded voice mail message attachments.

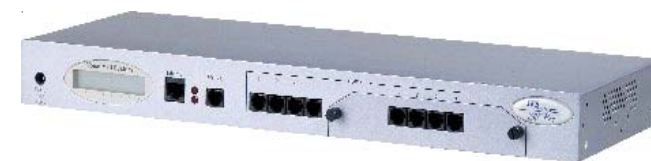

Unified Messaging Module

Cortelco's Corsair
